

### Specification of penetration bitumen 60/70

| Bitumen 60/70                        | Specification | Test method    |
|--------------------------------------|---------------|----------------|
| Penetration @ 25 c                   | 70/60         | D.5            |
| Softening point c                    | 49/56         | D.36           |
| Ductility @25 c                      | 100 Min       | D.113          |
| Loss on heating(wt) %                | 0.2 Max       | D.6            |
| Flash point c                        | 250 Min       | D.92           |
| Solubility in CS <sub>2</sub> (wt) % | 99.05 Min     | D.4            |
| Drop in penetration after heating %  | 20 Max        | D.5            |
| Density @25 c                        | 1.01/1.06     | D.70/D.3289    |
| Spot test                            | negative      | A.A.S.H.O.T102 |
